

EPA Metadata Editor (EME)

The EPA Metadata Editor (or EME) is a software tool that aids the practical documentation of geospatial datasets. The simple EME application allows GIS professionals to create, edit and validate their metadata records. EME is used extensively worldwide.

New in EME 3.1.1

EME Version 3.1.1 provides users with the ability to edit and synchronize FGDC CSDGM metadata in ArcGIS Version 10!

EME Version 3.1.1 runs as an ArcGIS Extension and as a standalone desktop tool.

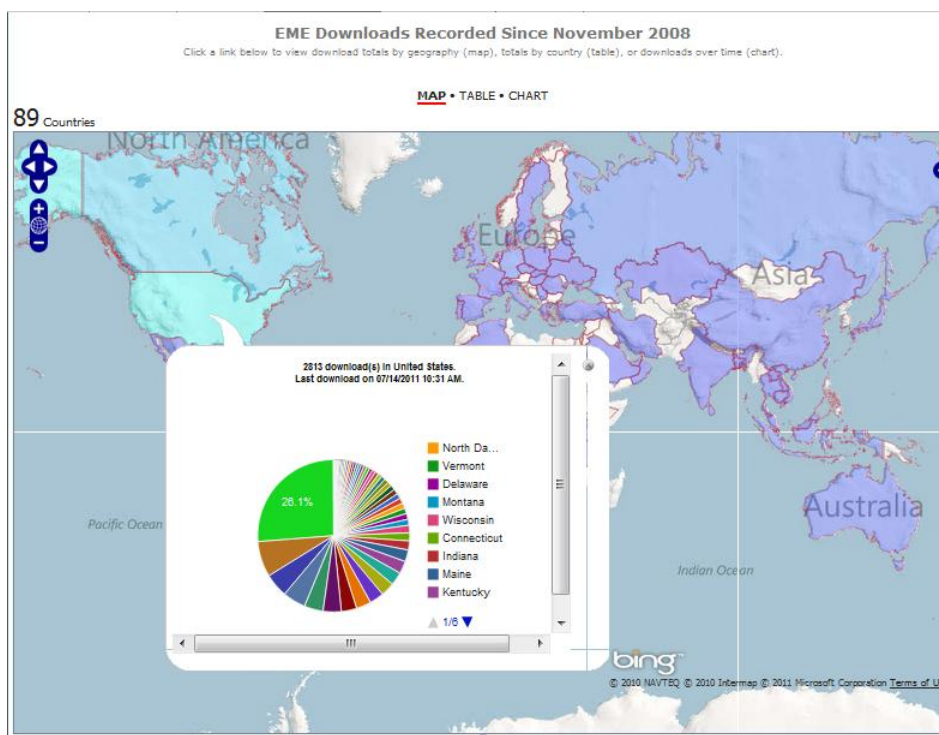

Check the [EME website](#) for additional materials.
